

## Junior Certificate & Leaving Certificate Preparation Courses

This course is specifically for secondary school students preparing for state examinations.

We prepare our participants using a technique known as Blended Learning. This approach blends online language training with traditional classroom work, making language learning easier, quicker and more enjoyable.

Students on this programme rapidly gain confidence in using their second language. They will improve their pronunciation skills and listening skills using state of the art voice-recognition technology and other online exercises. This will powerfully prepare them for their oral and aural examinations.

In the classroom they will enjoy top quality tuition on how to achieve their best when it comes to the written papers. They will gain freedom in expressing themselves in their second language and therefore receive a complete and excellent examination preparation.

**12 week programme, 1 hour per week in the classroom with access to over 2000 hours of online training which is tracked and supported by the tutor. (A minimum of 2 hours of online training is recommended per week.)**

Courses commence every three weeks
